

Enrique Cabrera

IWA Vice President - Professor of Fluid Mechanics at the Universitat Politecnica de Valencia

Prof. Enrique Cabrera Jr. has over 20 years of experience in the field of management of urban water services. He has a Masters Degree in Industrial Engineering, a Masters in Efficient Use and Management of Water and a PhD in Hydraulic and Environmental Engineering. His activity revolves around urban hydraulics and urban water management. More specifically on topics related to performance assessment, benchmarking, regulation of water services, water and energy and infrastructure asset management. He is also the co-author of the IWA Manuals of Best Practices on Performance Indicators for Water Supply Services and Benchmarking.

Currently, he is the Vice President of the International Water Association, sitting in its Board of Directors and chairing IWA Publishing. He is also chair of the IWA Benchmarking and Performance Assessment Specialist Group.

Enrique is a Full Professor at the Polytechnic University of Valencia where he lectures on Fluid Mechanics and currently serves as Vice-Dean of the Industrial Engineering Faculty.
